

CASE STUDY

Project: **Aldridge Parish Church**
Client: **Aldridge Parish Church**
Value: **£1.1m**
Location: **Aldridge**

“ Prior to being awarded the contract Shaylor Group worked collaboratively with the design team to achieve savings whilst maintaining quality. This collaborative approach remained intact during the construction process through to completion and for us was a very satisfying and pleasurable experience. This was achieved due to the construction team’s willingness to understand the aspirations of the employer and this was acknowledged when the Bishop of Lichfield, during his ‘blessing’ of the building, made reference and gave thanks to the Contractor. As Architects for the scheme we are delighted with the finished building and have no hesitation in recommending Shaylor Group to potential employers’
Phil Powell, St Paul Associates

Shaylor Group delivered a new build construction project to remodernise the Aldridge Parish Church hall. Located in the centre of Aldridge, the facility provides local residents with church facilities to suit various requirements. The project enabled the creation of new rooms to benefit the community, including function spaces, toilets, meeting rooms, offices and a catering kitchen. Close liaison was kept with local residents to ensure minimal disruption to day-to-day activities.

Building a Better Future
